

## Toolkit 2 - Learning Unit 4 Pre intervention

### Activity 5

#### What are methods to nourish human rights during interventions?

List

#### Education & Awareness

Education about human rights must become part of general public education. Understanding the individual needs of any human being and taking these needs into consideration while providing psychological care is necessary. You must be aware of all types of diversity and how to accommodate your intervention based on the individual human needs.

#### Dialogue

Getting to know the feelings of ordinary people of each subgroup might help to change the demonic image of the enemy group. Dialogue also helps people at the grassroots level to discover the truth about what has happened, and may provide opportunities to understand and help. You can only find the appropriate approach by asking and listening.

Project Number: 2020-1-PL-KA202-082075- Strategic Partnerships for vocational education and training

### Monitoring

Those who perpetrate human rights violations find it much easier to do so in cases where their activities can remain secret. Monitoring should not only expose violations, but also increase the awareness of human right protection.

### Supervision

The possibility to discuss each or problematic case is the opportunity to discover an ethically problematic situation.
