

Dear Learner,

Welcome to Psych.E.In. (Psychological Early Intervention) MOOC 2 targeted to Vocational Educational Trainers (VET) of psychologists, psychotherapists and psychoanalysts interested in improving competence in training courses about psychological interventions in emergency.

The MOOC 2 was developed by Psych.E.In. consortium in the year 2021. It is an online course, free and easily accessible.

The schema of the course is developed starting from a description of the emergency psychology professional profile, defining basic knowledge, skills and competences and developing different kinds of individual and group early psychological interventions. MOOC 2 offers to VET trainers of psychologists, psychotherapists and psychoanalysts a comprehensive theoretical frame and many learning activities in early psychological intervention courses. At the end of the MOOC you are supposed to revise understanding of basic courses on Early Psychological Intervention and different methods to improve clinical and emergency management competence in emergency and crisis intervention. More specialistic skills have to be acquired in further specific training.

MOOC 2 is composed by 6 Learning Units:

- Learning Unit 1 - Profile of Emergency Psychologist - AKP (CZ)
- Learning Unit 2 - Empathy: Psychologists' Keystone in Early Intervention - IAAP (FR)
- Learning Unit 3 - Individual Training in Early Intervention Psychology - UJK (PL)
- Learning Unit 4 - Group Training - IGAA (EL)
- Learning Unit 5 - Supervision of complex interventions – UoP (SK)
- Learning Unit 6 - Teaching Emergency Management - EMDR (IT)

Each Learning Unit will take you almost one hour for the theoretical parts (chapter 1, 2 and 3) and another one hour for viewing the practical and exercise part (chapter 5 methods and good practices). MOOC 2 theoretical training lasts almost 6 hours. Adding the practical exercises, it lasts almost 12 hours. You can work through the content at any time and at your own pace or download materials as you prefer.

Once you have completed the course, you will be eligible to download a free, personalised certificate of completion released by the Jan Kochanowski University of Kielce (PL). To receive it, you have to get at least 70% correct answers of the self-evaluation test at the end of each Learning Unit and at least 70% correct answers of the final test at the end of the MOOC.

At the end of your MOOC, we look forward to your contribution and comments at [psycheinproject@gmail.com](mailto:psycheinproject@gmail.com)

I wish you a lot of success training yourself with Psych.E.In. MOOC 2.

Monika Szpringer

Head of the Department of Health Psychology and Psychiatry,  
UJK Collegium Medicum, Head of the UJK Crisis Intervention Centre
